

Cé aige a bhfuil?

CLUICHE 2c don rangsheimra

Game 2c for the classroom

The objective is to complete a “circuit”, starting and finishing with the same player. Each player is given at least one card. As all 24 cards must be in play, some players may have to be given two or more cards. Any player can start. The starter must call out the question in the yellow box in the **lower section of the card**. The player who has the picture that answers the question must read out the reply. That player then asks the question in the yellow box in the **lower section** of her/his card. Play continues in this manner. There is no winner or loser - it’s just a matter of the group completing a circuit faster than their previous attempt!
